

**photoluminescent plastic masterbatch**

	Code	Model	AFTERGLOW INTENSITY (mcd/m <sup>2</sup> )		Glowing color
			10min	60min	
PE Series	PLE-PP-PE-G30	PE-G30	250	35	Yellow-green
	PLE-PP-PE-B30	PE-B30			Blue--green
PVC Series	PLE-PP-PVC-G30	PVC-G30			Yellow-green
	PLE-PP-PVC-B30	PVC-B30			Blue--green
PP Series	PLE-PP-PP-G30	PP-G30			Yellow-green
	PLE-PP-PP-B30	PP-B30			Blue--green
ABS Series	PLE-PP-ABS-G30	ABS-G30			Yellow-green
	PLE-PP-ABS-B30	ABS-B30			Blue--green

1. photoluminescent plastics master batch is a kind of plastics pellet that has the characteristics of self-glowing, it is made of our high-tech luminescent materials---photoluminescent pigment by deep processing.

2. Special master batch or concentration and so on of photoluminescent master batch can be processed based on customers' requirement.

3. Minimum order quantity: 25kg.

4. Packing: 25kgs per bag
